

RAM KUMAR PANDEY

Software Developer | Game Developer | TypeScript | PixiJS | Phaser

ramkumarpandey243@gmail.com • 9162024573 • [linkedin.com/in/rajveerpandey](https://www.linkedin.com/in/rajveerpandey) • [techtube.co.in](https://www.techtube.co.in)

PROFESSIONAL SUMMARY

Software Developer with 3+ years of experience in HTML5 game development, specializing in TypeScript, PixiJS, Phaser, WebGL and Canvas-based game development. Experienced in production-grade slot games, reusable game components, reel/symbol systems, animations, UI, event-driven gameplay, asset pipelines and performance optimization. Also experienced in full-stack web development with React, Go and MongoDB.

WORK EXPERIENCE

Game Developer — Gamemano

04/2026 – Present | Noida, India

- Develop and optimize production-grade HTML5 slot games using TypeScript and PixiJS, focusing on scalable architecture, smooth gameplay and cross-browser performance.
- Implement reel/symbol rendering, spin flow, game states, animations, UI interactions and event-driven gameplay.
- Build reusable game modules and components to improve maintainability and accelerate development across projects.
- Optimize asset loading, texture usage, rendering pipelines, animations and game logic for responsive runtime performance.
- Integrate game clients with REST APIs; debug gameplay, rendering and API issues using Postman and browser developer tools.
- Collaborate with designers, QA and backend teams to deliver production-ready builds using Git and Azure DevOps.

Tech: TypeScript, PixiJS, HTML5 Canvas, WebGL, REST APIs, Postman, Git, Azure DevOps

Developer — Merkur Gaming India

11/2022 – 03/2026 | Noida, India | Promoted: Trainee → Associate Developer → Developer

- Developed and optimized production-grade HTML5 slot games using TypeScript, PixiJS and Phaser.
- Implemented reel/symbol systems, spin flow, game-state management, animations, UI interactions, event handling and gameplay logic.
- Worked extensively with PixiJS rendering, sprites, textures, masks, containers, Canvas and WebGL to build interactive game experiences.
- Improved performance through asset-loading optimization, rendering optimization, efficient animation handling and code-level improvements.
- Integrated REST APIs and debugged gameplay, rendering, browser compatibility and backend-integration issues across devices.
- Used SonarQube and Jenkins for code quality and CI/CD workflows; collaborated with QA, design and backend teams through release cycles.

Tech: TypeScript, JavaScript, PixiJS, Phaser, HTML5 Canvas, WebGL, ReactJS, REST APIs, SonarQube, Jenkins, SVN

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Go, HTML5, CSS3

Web: ReactJS, Tailwind CSS, REST APIs

Tools: Git, SVN, Jenkins, Azure DevOps, SonarQube, Postman

Game: PixiJS, Phaser, WebGL, Canvas, Animation, Slot Game Dev

Backend: Go, MongoDB, Node.js, Express.js

Core: OOP, DSA, Problem Solving, CI/CD, GenAI, Prompt Eng., Three.js

PROJECTS

TechTube — Developer Learning Platform | 10/2024 – Present

Live: <https://www.techtube.co.in/>

- Built a developer-focused learning platform for discovering high-quality programming tutorials and community-recommended resources.
- Developed the responsive frontend with ReactJS and Tailwind CSS, with Go backend services and MongoDB for data management.
- Implemented user authentication, learning progress, learning streaks, video/series management and analytics-focused features.

Tech: ReactJS, JavaScript/TypeScript, Tailwind CSS, Go, REST APIs, MongoDB, Git

EDUCATION & ACHIEVEMENTS

B.Tech, Computer Science & Engineering — IEC College of Engineering & Technology | 2019–2023 | 78%

CodeKaze 2022: Rank 1538/30,000+ • GeeksforGeeks: Rank 2/280 at college • LeetCode Annual Badge 2022 (300+ days)

Languages: English (Professional) • Hindi (Full Professional) **Interests:** Travel, Photography, Chess
